

姓名	Graham Ingram	
現職	General Manager - AusCERT	
簡歷	<p>Graham Ingram is the General Manager of AusCERT. He took up the position in January 2002 after 17 years employment with the Australian government. Immediately prior to joining AusCERT, Graham worked with the Australian Department of Defence where he was responsible for managing computer security incident reporting and response for Commonwealth government agencies.</p> <p>Graham has extensive experience in critical information infrastructure protection (CIP) and spent four years working in this area for the government. During this period he managed a number of major IT security and information protection issues including computer network attacks during the Y2K period and IT security threats to the 2000 Olympic games.</p> <p>Since joining AusCERT, Graham has consolidated AusCERT as Australia's premier Computer Emergency Response Team (CERT) and strengthened its strategic relationships particularly in the Asia Pacific region. AusCERT hosts the annual AusCERT Information Security conference, the foremost IT security event in the Asia-Pacific region.</p> <p>AusCERT is based at The University of Queensland which has one of the largest networks in Australia.</p> <p>Graham has a BSc (honours).</p>
